

Dear Educator,

The **Clean Tech Competition** is an international research and design challenge for 15-18 year old pre-university students. This is a prestigious educational opportunity for students across the world, and we want to invite your students to participate in the **2015 Clean Tech Competition!**

Competition Information

Each year, the **Clean Tech Competition** encourages scientific understanding of real-world issues and the integration of environmentally responsible energy sources. The 2015 challenge, "**Feed the World**" asks students to develop a clean technology solution to the problems of an inadequate and unstable food supply.

- Teams of 1-3 students, assisted by a Team Leader, work to develop a written proposal.
- There is no entry fee!
- Registration is online, opening in November 2014.
- Paper Submissions are due March 2015.
- 10 Finalists are selected, given a \$200 stipend and matched with a Mentor to help them prepare a Prototype and presentation for the Finalist Event.
- In May 2015 the finalists are invited to Philadelphia, Pennsylvania, USA to compete for the grand prize of **\$10,000!**
- Additionally the grand prize team wins a **Continued Mentorship!**
- And all 10 finalists get the chance to nominate their school or educational organization for a **\$1,000** grant!

For extensive competition details please visit www.cleantechcompetition.org.

How can your students get involved?

- To help bring the **Clean Tech Competition** to your school, share information about this opportunity with students, parents and other educators.
- Anyone interested in receiving future mailings should email us.
- Contact us with any questions!

We look forward to having participants representing your school in the **Clean Tech Competition** this year and in years to come!
