2015 Clean Tech Competition
Challenge your students to "Feed the World"
Win up to $10,000!

REGISTRATION IS NOW OPEN!

Registration is now open for the 2015 Clean Tech Competition, a global research and design challenge for 15-18 year old students. This year's challenge is to **"Feed the World"**.

This educational opportunity challenges students to develop innovative, **clean technology solutions to real-world issues**. Solutions may take on aspects of growing, harvesting, distributing, or any other aspect of food availability. Student participants will gain experience with focused research, critical thinking, and the scientific process – making it a great **project based learning opportunity**.

There is **no entry fee**, and students can participate through school, extracurricular programs, or on their own. The 1st Place Team will **win $10,000** and Finalist Teams can win **$1,000 for their school/organization**. The Finalist Event will be held in Philadelphia, PA in May 2015, when Finalist Teams will meet to explore fun and educational activities, present to a live panel of judges, and network with industry professionals.

There is no limit to the number of Teams per organization – so **spread the word!** Each stage of the competition is designed to be a rewarding process, and more student participation means inspiring more young scientists to help build a better future for our planet.
