

Busking Physics

Science On Stage Ireland, Institute of Physics Ireland & CASTeL will be busking Physics on Grafton Street on July 7th and at the Convention Centre on July 14th from 11.00 – 14.00. This is a FREE event and part of ESOF 2012 Dublin City of Science celebrations. For more info contact paul.nugent@gmail.com

Busking is an established activity on Grafton Street Dublin and in this spirit of bringing culture to the streets of Dublin. But Dublin streets have only seen this type of busking once before. A team of Irish Science teachers and pre-service science teachers will take to Grafton Street on July 7th, to share physics with the passing public as part of ESOF Dublin City of Science 2012. This will be repeated on July 14th at the Convention Centre where visiting scientists will be attending ESOF and also at other 'Pop Up' venues around the city - to be announced.

These events are coordinated by Science on Stage Ireland, the Institute of Physics (IoP) in Ireland and CASTeL. Sponsorship is by Dublin City of Science a ESOF's Science in the City programme. Interaction is essential and members of the public will get to partake in demonstrations of Archimedes Law of Forces shown with a tug of war, Bernoulli's Law for Fluid Flow with giant windbags, Faraday's Law of Induction shown with a simple motor, vortex blower, musical straws, windmills and rockets and much more.

Central to this, is the concept the **Physics is Fun!**

The event is free and the passing public are invited to interact with science concepts using simple everyday items. Geared for All Age. So come along and join in! Check out many of the demos at www.scienceonstage.ie

This is a FREE event with NO tickets required

Organizers: Science On Stage Ireland, Institute of Physics & CASTeL DCU

Date: July 7th 2012 and July 14th 2012

Venue: Grafton St, Convention Centre other venues TBA

Time: 11.00-14.00

Contact: paul.nugent@gmail.com
