

CERN Mobile Exhibition "Accelerating Science"

Leisureland, Galway Thursday, 13th September - Sunday, 4th November, 2012

The Galway Science & Technology Festival in conjunction with ESOF2012 and Boston Scientific Galway brings this exciting Scientific Exhibition to Leisureland, Salthill, Galway. This Exhibition is open to primary and secondary schools and also to the public.

"Accelerating Science" is CERN's flagship travelling exhibition. For those curious about the origins of our universe, the nature of the particles we are all made from, and the power of fundamental science. In five modules, it takes visitors on an extraordinary journey, starting with the Big Bang. The particles, the mysteries of the universe and the LHC's exploration of matter guide the visitor through this early-21st-century scientific adventure and discover how fundamental science has changed the world as we know it.

This unique Scientific Exhibition is coming exclusively to Galway from CERN, Geneva - the European Organisation for Nuclear Research, one of the world's largest and most respected centres for fundamental physics and scientific research.

Information and Bookings

For you, your class, your teacher, your parents, the public at large to visit "Accelerating Science" at Leisureland Galway there will be a booking system in place from Tuesday, 1st May 2012.

In the meantime if you wish to register an interest please do so by mailing us at galwayscience.events@gmail.com
