

**CLEAN TECH
COMPETITION**

2015: Feed the World

The annual **Clean Tech Competition** is a worldwide research and design challenge for students ages 15-18. Students work in teams to create a clean technology solution to a global problem. The program encourages scientific understanding of real-world issues and the integration of environmentally responsible energy sources.

Round 1: Paper Submissions **Round 2:** Prototype and Presentation

2015 Challenge:

Develop a clean technology solution to the problems of an unstable and inadequate food supply. Solutions may take on aspects of growing, harvesting, or distributing food, or any other facet of food availability that you choose to improve. Your team will identify a specific problem, explain and analyze in detail, and design a solution that can be used to help the affected populations.
