Practical workshop for Chemistry Teachers

If you are **recently qualified** or **just starting out** as a chemistry teacher then this course is for you. The workshop will be held in March in three venues around the country.

Experienced teachers will demonstrate and explain all aspects of the following procedures: making up solutions, shelf life, dilutions, storage of chemicals, recipes for solutions and redox titrations.

Teachers will have an opportunity to practice these procedures so bring your lab coats and be prepared to get your hands wet.

***Designation of hours under the Croke Park Agreement is at the discretion of School Management (DES CL 25/2011 and CL 43/2014). A confirmation of attendance will be available**
