

PDST Physics Workshops Spring 2014

Using the Inquiry Based Learning (IBL) Approach to stimulate student thinking with exciting demonstrations and resources on the night

In response to the autumn workshop feedback and issues highlighted in the Chief Examiner's Report You are invited to network with colleagues to:

- ⇒ practice guiding students how to learn and build self-directed learning skills
- ⇒ trial electric inquiry based activities and the investigative questioning skills which convert information and data into useful knowledge
- ⇒ hear how the Chief Examiner's Report may direct our teaching and help us to be aware of the difficulties students have
- ⇒ explore a CD of resources which includes New Science on Stage videos, Updated LC physics Q&A by topic, Virtual Physics Laboratory taster, instructions for the IBL activities and more.
- ⇒ These workshops will also update teachers on events happening nationally and other beneficial resources which are available free of charge for educational purposes.

Date	Education Centre	Date	Education Centre
19/03/2013	Dublin West	20/03/2014	Kilkenny
