

Does your Science/Physics
teaching need a little bite?

Physics Workshops Autumn 2015

These Workshops will focus on Electromagnetism, and are planned to suit both Junior Certificate Science teachers and Leaving Certificate Physics teachers. Participants will benefit from the hands-on experience and discussion with colleagues on the activities. A handout will be available on the night.

Topics include:

- magnetic fields
- forces on moving charges
- generators
- mutual induction
- magnetic effect of an electric current
- laws of electromagnetic induction
- motors
- self induction
- transformers
