

Dublin's Victorian Diving Bell

Sir John Rogerson's Quay

(opposite National Convention Centre)

An illustrated talk and a tour

Presenter: Joe Ryan

Venue: The Ferryman 35 Sir John Rogerson's Quay, Dublin 2

Date: Tuesday 15 March

Time: 7.30pm (followed by a viewing of the interior of the bell)

Bindon Blood Stoney was the engineer who designed the quay walls for the River Liffey, and in the process, he pioneered the use of precast concrete. He designed the diving bell to carry out the work. He was the brother of the physicist George Johnstone Stoney, known for coining the term *electron* for the fundamental unit of electricity. To book: <http://tinyurl.com/loPDivingBell> .
