

# I love teaching

**The Phorms Concept is based on bilingual education, qualified day-care and individual talent fostering.**

For the **school year 2013/2014** we are looking for a qualified

**Teacher of Secondary Science (Biology, Chemistry, and Physics); teaching competence in Math would be appreciated as well**

for our PhormsSchool Frankfurt TaunusCampus in **Germany**, at which the above mentioned subjects are taught exclusively in English.

Once you would have passed the recruitment process successfully, you would be joining a high performing and dedicated faculty, enabling all pupils to achieve their potential.

We instruct according to the official core curricula of Hesse (Land in Germany, the school system of which is federally structured) and the Cambridge curriculum. As a state-registered school we are required to guarantee the equality, not the identity of what is required in state schools. This frees up space when it comes to a flexible and creative approach to teaching.

**The following tasks are linked with a teaching position:**

- Giving lessons,
- the planning of the lessons, including a year plan and weekly plans,
- being responsible for the students' assessments, especially the formal tests, including their correction,
- the attendance of at least one of the two parents' evenings per school year
- the attendance of the two „parent-teacher-interviews“ per school year,
- the attendance of regular staff meetings.

Applications are invited from qualified secondary teachers ideally with a Master's degree or a first and second state exam, a track record of high quality learning and teaching and the ability to participate in inspiring the school community with your educational and personal talents.

A working knowledge of German is beneficial; however the commitment to learning German is required.

We seek enthusiastic teachers with an open-minded and authentic character who enjoy working with children. Your application will be much appreciated.
